

Renewal Order of Scurrilous Monks

Abbot's Report

Summer Solstice 2020

This short *Report* opens with an excerpt from our official astrologer's "*Celestial Events of June*":

Happy New Moon of June! New Moon in Cancer 00°21' Sunday 21 June at 1:21 am

Very powerful New Moon, as it occurs in the Summer Solstice degree. Esoterically: "A radical change of allegiance exteriorized in a symbolic act: a point of no return."

Hard Times for Rennies

Working at renaissance faires two days a week for six months a year has provided marginal livings for many of us but it's a risky business. There's not much room for error. At the end of the winter, often, there is barely enough money left over to travel to the first show of the season. When one's first show of the season is plagued with rainy weather, vehicular breakdowns or botched promotions, one is apt to find one's self in rennie hell. Hundreds of professional festival workers start their seasons every year at the Florida Renaissance Festival near Deerfield Beach. FLARF opened on February 8 this year and they expected to run for seven weekends. Due to the Covid 19 plannedemic, the show was forced to shut down after its fifth weekend. Whoops. Many participants had been counting on making enough money during the show's last two weekends to get out of town and to travel to their next show. Not only did they not have enough money to get out of Florida, in most cases, their next shows had also been canceled. Congratulations and praise go out to FLARF manager Bobby Rodriguez and his staff who did everything they could to make the situation less awful for those in trouble. The Tennessee Renaissance Festival canceled its 2020 season. The Sterling Renaissance Faire, near Fairhaven, New York, was planning to open in 2020 but they changed their minds at the end of May and they canceled. Closer to New York City, The New York Renaissance Faire will also not be opening in 2020. The Bristol Renaissance Faire, in Wisconsin, won't be opening in 2020 either. The Colorado Renaissance Festival usually runs in June and July but they've postponed their 2020 season and they are planning to open this year in early August. What could go wrong? The North Dakota Renaissance

Festival, which had shut down in 2019 after completing only two weekends of their planned 8 weekend inaugural season, canceled plans to re open in 2020. The Siouxland Renaissance Festival in South Dakota is also not opening in 2020. And so it goes, all over the country. The Minnesota Renaissance Festival is planning to open in 2020 for their 50th annual season but they are, once again, claiming that this will be their last year in their original location. The landowners want the silica sand underneath the festival more than they want the festival. Mid America Festivals has purchased 150 acres near the Scott County Fairgrounds and they plan to move there in 2021. Not surprisingly, there has been some opposition from local residents. Our Abbot has not set foot on a renaissance faire in the past four years. There's a big problem with giving a bunch of rennies a year or two off. Packing up and moving four or five times a year is difficult. Staying at home, where there is hot and cold running water, is oh so much easier. Many of us will be forced to seek out alternative sources of income. Once a rennie gets used to having a mailbox, a flushing toilet and a regular paycheck, it can be very difficult to go back to a life on the road. Many will reach a point of no return.

Abbot Bemoans Lousy Storytelling

2020 has been a year for false narratives. Most of our information has been contaminated with misinformation and disinformation. Traditionally, the mainstream media has been able to fool most of the people most of the time by repeating their big lies day after day. A few months ago, our Abbot actually heard a newsman repeat the old lie about Lee Harvey Oswald having assassinated President Kennedy! The good news is that the big lies aren't working as well as they used to. An unintended(?) consequence of the 2020 shutdown has been that the public has had more time and leisure to explore alternative news sources. Many of those sources have pointed out that the likelihood of the Carona virus having originated in a Chinese open air market when a fresh fish was contaminated with bat blood is fairly low. The Lee Harvey Fishmonger story stinks to high heaven. The dweeb who came up with that one ought to have his storyteller's license revoked. There is plenty of evidence to suggest that

various strains of the Carona virus are genetically engineered biological weapons. There are multiple suspects with multiple mysterious motives and agendas. Some of the psychopaths may be revealed next month.

The Unveiling Continues

The second half of 2020 may bring revelations and disclosures. The Benevolent Order's official astrologer, Brother Francis (David Doyle), has been casting Pearls of Wisdom before our porcine Abbot for many years. We recently received "*Celestial Events of July*". Here is a short excerpt that gives us something to dread or something to look forward to some time around French Independence Day:

Mars aligns with Chiron of the Centaurs

Tuesday 14 July at 4:08 am ***This brings us to the point of seeing in full bloom now, that which was hidden in the beginning, as a seed underground just sprouting. On 13 January 2020, the Earth and Sun, Mercury, Saturn, and Pluto were aligned; and the first hidden cases of COVID-19 arrived in the USA.

Our Abbot has been expecting more revelations for the past several years. There is much that is hidden. Satanic practitioners of black majick have been able to delay and stretch out the time of the unveiling but the rubber band has broken and it is now snapping back rapidly. Time seems to be moving faster. Many revelations and disclosures that have been delayed may all be coming at once. More than 5,000 top secret patents could be declassified. The masses might learn about:

- Antigravitic flying vehicles, large and small
- Free energy devices
- GESARA debt jubilee and Universal Basic Income

- Technologies capable of cleaning our oceans, lakes and streams
- Neutralization of radiation
- Telepathic communication
- Available cures for every incurable disease
- Nanobots and nanochips
- Advanced prehistoric civilizations
- Giants
- Deep Underground and Undersea Military Bases and cities
- Supersonic Underground railways
- Secret bases in Antarctica
- Secret Space Programs with off world bases
- Interstellar travel
- More intelligent life on other planets
- The theft of many trillions of dollars perpetrated by large banks
- The end of Federal Reserve Notes and petrodollars
- Revaluation of all currencies based upon precious metals
- Prosecution of murderers of 9/11/2001
- Prosecution of murderers of 3/11/2011 (Fukushima)
- Human trafficking, slavery and organ marketing
- Ritual child sacrifice and torture
- Adrenochrome
- Teleportation
- The complicity of the media in keeping all of these things secret from the Luddites

Some people are likely to be angry when they find out that their chronic pains could have been eliminated years ago, that their children didn't have to die or that their tax dollars have been paying for luxurious underground cities that they were never meant to know about. It will be interesting to see how the elites will spin these stories. Our Abbot loves a good story. His stated goal for 2020 is to buy a cornerstone that says, "MMXX". In conclusion, Brother Ted the Head (Ted King) died. RIP Ted

**BRISTOL
RENAISSANCE
FAIRE®**

By order of the Queen (and the CDC)
the Faire is closed for the 2020 season.

FARE THEE WELL!
We shall see thee anon.
